**IBM Communications Server for OS/2 Warp
Version 4.1 Enhancements**

February 1997

Take Note!

Before using this information and the product it supports, be sure to read the general information in Appendix H, "Special Notices" on page 333.

First Edition (February 1997)

This edition applies to Version 4, Release Number 1 of the IBM Communications Server for OS/2 Warp, Program Number 5801-AAR (84H1802) for use with the OS/2 Warp Operating System.

Preface	ix
The Team That Wrote This Redbook	ix
Comments Welcome	x
<hr/>	
Part 1. Overview	1
Chapter 1. Release Overview	3
1.1 CM/2 Evolution to Communications Server	4
1.2 Product Packaging	6
1.2.1 OS/2 Access Feature	8
1.2.2 Windows Access Feature	10
<hr/>	
Part 2. Client/Server Programming	11
Chapter 2. WIN - OS/2 CPI-C Applications	13
2.1 Overview	13
2.2 Functionality	14
2.3 Installation	14
2.4 Configuration	16
2.5 Toolkit	18
2.6 APING for WIN-OS/2	19
2.7 Problem Determination	20
<hr/>	
Part 3. Networking	23
Chapter 3. APPN Enhancements	25
3.1 Backup Link	25
3.2 Functionality of APPN Backup Link	26
3.3 Using High-Performance Routing with Backup Link Support	28
3.3.1 Other Considerations	29
3.4 Configuration and Installation	29
3.4.1 Defining APPN Backup Link Support Using CMSETUP	30
3.4.2 Configuring APPN Backup Link Support Using Response Files	38
3.4.3 Example of .NDF File	39
3.5 Non-Limited Resource for a Connection Network	41
3.5.1 Configuration	42
3.5.2 NDF File Entries for Connection Networks	43
<hr/>	
Part 4. AnyNet Multiprotocol Support	45
Chapter 4. Sockets over SNA Access Node and Gateway	47
4.1 Overview	47
4.1.1 What Does Sockets over SNA Do?	47
4.1.2 How Does Sockets over SNA Works?	48
4.2 Sockets over SNA Enhancements	50
4.2.1 Backup and Load Balancing	50
4.2.2 Datagram Retry Delay	53
4.2.3 Route Discovery	54

4.2.4	How Sockets over SNA Gateway Routes Data	56
4.2.5	Routing Information Protocol (RIP)	57
4.2.6	Maximum Number of Connections Increased to 2000	60
4.2.7	Variable Subnetting Is Now Supported	61
4.3	Sockets over SNA Configuration	62
4.3.1	Planning the Routing in Your Sockets over SNA Network	65
4.3.2	Setting Up Sockets over SNA	65
4.3.3	Configure SNA and MPTS	77
4.3.4	Configuration Extract	91
4.3.5	Capabilities of the Sample Configuration	94
4.4	Troubleshooting	94
4.4.1	Troubleshooting Steps	95
4.4.2	Sockets over SNA Gateway and Parallel Gateway Tools	98
4.4.3	Traces	102

Part 5. LAN Gateway 103

Chapter 5. Introducing the LAN Gateway	105
5.1 What Does the LAN Gateway Do?	105
5.1.1 Connecting NetBIOS and IPX Applications over an SNA WAN	105
5.1.2 Connecting Socket Applications over an SNA WAN	106
5.1.3 Connecting NetBIOS and IPX Applications over an IP WAN	107
5.1.4 Running NetBIOS and IPX Applications on the LAN Gateway Using the Loopback Mode	107
5.2 Some Basics about LAN Protocols	108
5.2.1 The IEEE 802.2 Protocol	109
5.2.2 The IPX Protocol	110
5.2.3 The NetBIOS Protocol	111
5.3 How Does the LAN Gateway Work?	112
Chapter 6. Planning for the LAN Gateway	115
6.1 Hardware and Software Requirements and Recommendations	116
6.1.1 System Hardware	116
6.1.2 Network Hardware	116
6.1.3 System Software	116
6.2 Compatibility Considerations	117
6.3 Coexistence Restrictions	117
6.4 Network Planning Considerations	118
6.5 Setting Up the LAN Gateway	118
6.5.1 Defining the Local LAN Gateway Workstation	118
6.5.2 Setting Up LAN Resources	119
6.5.3 Defining the WAN Links between Partner LAN Gateways	126
6.6 Setting Up IPX and NetBIOS LANs	127
6.6.1 IPX LAN Considerations	127
6.6.2 NetBIOS LAN Considerations	129
6.7 Setting Up WAN Connections	129
6.7.1 SNA APPN and Subarea WANs	129
6.7.2 IP WANs	130
6.8 Installation and Configuration Methods	130
Chapter 7. LAN Gateway Scenarios	133
7.1 Definitions Used in the Scenarios	134
7.2 Installing the LAN Gateway	134
7.3 Configuring the LAN Gateways	138

7.3.1 Configuration of LAN Gateway: LANGWx	139
7.3.2 Configuration of LAN Gateway: LANGWy	141
7.3.3 Configuration of LAN Gateway: LANGWa	143
7.4 Defining the Links between the LAN Gateways	146
7.4.1 Defining the Links between LAN Gateway LANGWx and Its Partner(s)	146
7.4.2 Defining the Links between LAN Gateway LANGWy and Its Partner(s)	149
7.4.3 Defining the Links between LAN Gateway LANGWa and Its Partner(s)	152
7.5 Setting Up the LAN Gateways	154
7.5.1 Setting Up System: LANGWa	154
7.5.2 Setting Up System: LANGWx	158
7.5.3 Setting Up System: LANGWy	161
7.6 Starting the LAN Gateway	163

Part 6. Dependent LU Support 165

Chapter 8. Multiple PU Support on a Single SDLC Link	167
8.1 Introduction	167
8.2 Enhancements Related to SDLC Support in Communications Server 4.0	168
8.3 Configuration of Dedicated PUs Using a Single SDLC Link	169
8.4 Additional Pooling Capabilities	178
8.4.1 Configuration of Pooled LUs	178
8.5 Implicit Workstations Using the Gateway	181
8.5.1 Configuration for Implicit Workstations Using the Gateway	181
8.6 Explicit Workstations Using the Gateway	185
8.6.1 Configuration for Explicit Workstations Using the Gateway	185
Chapter 9. The TN3270E Server	191
9.1 Overview of TN3270E Server	191
9.1.1 Functions Supported by TN3270E Server	194
9.2 Supported Client Workstations under TN3270E Server	195
9.3 Highlights	195
9.3.1 Changing the Default Port Number	195
9.3.2 Managing System Traffic	195
9.3.3 Configuring SNA Connections	196
9.3.4 Server LUs	196
9.3.5 Pooling	196
9.4 System Resources	197
9.5 Interfaces	197
9.6 TN3270E Server Parameter Profiles	197
9.7 Configuration Overview	199
9.7.1 Profiles	199
9.7.2 TN3270E Server Parameters	200
9.7.3 TN3270E Server Additional Class Definitions	201
9.7.4 Printer Association	202
9.7.5 TN3270E Server Optional Parameters	202
9.8 Configuration Hints and Tips	203
9.8.1 MPTS	203
9.8.2 Creating Definitions	203
9.8.3 Explicit Workstation Definitions	203
9.9 Configuring the TN3270E Server Function	204
9.10 Scenario	204

9.10.1 Configuration	204
9.11 .NDF File Definitions	214
9.12 Response File Sample	217
9.13 Command Line Interface	217
9.14 Subsystem Management Panels	218
9.15 Problem Determination	220
9.15.1 Trace	220
Chapter 10. DLUS-Served LU Registration	221
10.1 Introduction	221
10.2 DLUS-Served Registration Overview	221
10.3 DLUR Overview	222
10.3.1 Benefits and Values of DLUR	225
10.3.2 Scenario	225
10.4 Configuration	226
10.5 .NDF File Definitions	235
10.6 Subsystem Management	237
10.6.1 Display	238
10.7 Trace	240

Part 7. Data Link Control	243
----------------------------------	-----

Chapter 11. Frame Relay Support	245
11.1 Overview	245
11.1.1 Frame Relay Overview	245
11.1.2 Frame Relay Network	247
11.1.3 Frame Relay Frame	248
11.1.4 Local Management Interface	250
11.1.5 SNA over Frame Relay	251
11.1.6 TCP/IP over Frame Relay	257
11.2 Configuration	257
11.2.1 Configuring MPTS	258
11.2.2 Configuring IBM Communications Server Release 4.1	266
11.2.3 Configuring TCP/IP over Frame Relay	269
11.3 LANTRAN.LOG	269
11.4 Problem Determination	270
11.4.1 Trouble Indicators	270
11.4.2 Troubleshooting Tips for Frame Relay	271
11.4.3 Tools	271
11.4.4 Frame Relay Tracing and Troubleshooting	273
11.4.5 Tracing IP Networks	282

Part 8. Appendixes	287
---------------------------	-----

Appendix A. Example Configuration Files	289
A.1 Local Configuration File Example	289
A.2 Global Configuration File Examples	289
A.2.1 Global Configuration File for LANGWx	289
A.2.2 Global Configuration File for LANGWy	293
A.2.3 Global Configuration File for LANGWa	297
Appendix B. Filter Program Application Program Interface	303
B.1 Overview of the Filtering Process	303

B.2 Supplied Filter (AXSFILTR.DLL)	303
B.2.1 Overview of the Default Filter Program	303
B.2.2 Input File Format	304
Appendix C. Loopback Mode	307
C.1 Overview of the Loopback Driver	307
C.2 Installing and Enabling the Loopback Mode	307
C.3 Recommendations for Configuring the LAN Gateway in Loopback Mode	308
C.4 Starting the LAN Gateway in Loopback Mode	309
Appendix D. Migration Considerations and Procedures for LTLW and IPX over SNA Gateway	311
D.1 Migrating LTLW Configurations	311
D.2 Migrating IPX over SNA Gateway Configurations	311
D.3 Converting Existing Configuration Files to the LAN Gateway Format	312
Appendix E. WAN TCP Port Number Used by LAN Gateways	313
Appendix F. VTAM Line Description for Multiple PU over a Single SDLC Line	315
Appendix G. RFC 1490 Extract	319
Appendix H. Special Notices	333
Appendix I. Related Publications	335
I.1 International Technical Support Organization Publications	335
I.2 Redbooks on CD-ROMs	335
I.3 Other Publications	335
I.3.1 Frame Relay Publications	336
I.3.2 LAN Publications	336
I.3.3 IPX Publications	336
I.3.4 NetView Publications	336
I.4 Requests for Comments (RFCs)	336
I.4.1 Obtaining Electronic Copies through FTP	337
I.4.2 Obtaining Electronic Copies through Electronic Mail	337
I.4.3 Obtaining Printed Copies	337
How to Get ITSO Redbooks	339
How IBM Employees Can Get ITSO Redbooks	339
How Customers Can Get ITSO Redbooks	340

ITSO Redbook Evaluation	347

Jose,
Thank you very much for
the work you did! It was
great working with you on this project.
Juan R. Rodriguez
IBM RTP, NC
USA

Preface

This redbook will help you to understand the latest release of IBM Communications Server for OS/2 Warp Release 4.1. The redbook describes and positions CM/2's evolution into Personal Communications and the Communications Server. It focuses on the new functions and enhancements implemented in this product, and will help you plan, install, and configure the new functions quickly in a wide variety of environments.

Some knowledge of previous releases of the IBM Communications Server for OS/2 Warp, as well as a basic knowledge of networking concepts and terminology used in the Systems Network Architecture (SNA) and TCP/IP, is assumed.

The Team That Wrote This Redbook

This redbook was produced by a team of specialists from around the world working at the Systems Management and Networking ITSO Center, Raleigh.

Juan R. Rodriguez is a Networking Specialist at the Systems Management and Networking ITSO Center, Raleigh. He holds an M.S. degree in Computer Science from Iowa State University, writes extensively and teaches IBM classes worldwide on areas such as Networking and Data Security. Before joining the ITSO a year ago, he worked at the IBM laboratory in Research Triangle Park (North Carolina, USA) as a designer and developer in networking products.

Max Strabeg is a Systems Engineer in IBM Austria. He has ten years of experience in workstation communication networks such as IBM LAN Server, Communications Manager and Novell NetWare in OS/2 and Windows platforms. He wrote several chapters and worked in most of the scenarios for this redbook.

Cesar Portocarrero is a Pre-Sales Support for the Network Software Division in IBM Andean. He has five years of experience in networking products such as VTAM/NCP, NPSI, CM/2, PCOMM, TCP/IP, SNA/Server for AIX and communications controllers. He holds a degree in Industrial Engineering and completed a Masters degree in Systems Engineering at the Universidad de Lima (Lima, Peru). His areas of expertise include SNA/APPN/HPR, TCP/IP architectures, X.25, SDLC, Frame Relay and LAN communication protocols mainframes, PC-based systems, AS/400 and RS/6000 platforms.

Jochem Just is a Customers Engineer in IBM Germany. He has 4 years of experience in OS/2 software support in the IBM German support organization. His areas of expertise include knowledge of early releases of IBM Extended Services, Communications Manager and Communications Server.

Jose J. Lira is a Technical Support Representative for the Availability Services Division in Peru. He has two years of experience in Local Area Networks. He holds a degree in Electronics Engineering from Universidad Catolica in Lima, Peru. His areas of expertise include OS/2, LAN Server and PC Servers.

Thanks to the following people for their invaluable contributions to this project:

John Mitchell
Bart Vashaw

Suvas Shah
Tom Carey
Bob Gibson
IBM Research Triangle Park, NC

Brian Elkins
IBM ITSO, Raleigh Center

Comments Welcome

Your comments are important to us!

We want our redbooks to be as helpful as possible. Please send us your comments about this or other redbooks in one of the following ways:

- Fax the evaluation form found in "ITSO Redbook Evaluation" on page 347 to the fax number shown on the form.
- Use the electronic evaluation form found on the Redbooks Home Pages at the following URLs:

For Internet users

<http://www.redbooks.ibm.com>

For IBM Intranet users
